

Advocacy for blue- green networks

Timișoara, Romania

- west of Romania
- 300.000 inhabitants
- 500.000 in the Metropolitan Area
- 1 main river
- built on a former swamp

from swamp to
drainage channels

in 200 years

What would a network of blue-green corridors give?

- increases the surface of green areas + accessibility
- creates new public spaces for recreation and social interaction
- stimulates alternative mobility
- increases biodiversity
- regulates temperatures
- reduces the risk of floods
- increases air quality

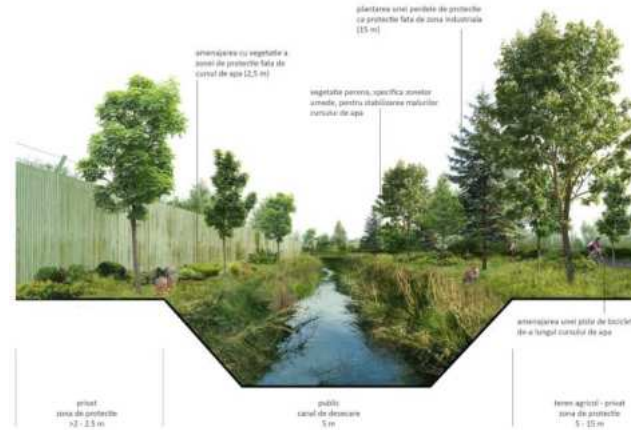

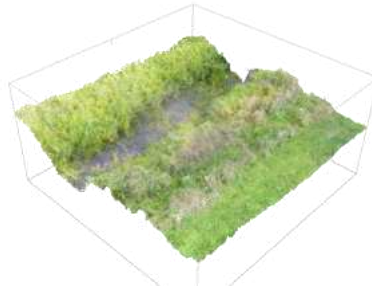

Increases the quality of urban life.

What did we - a group of professionals - do?

A bottom-up process of
research, dissemination and
communication

2018 - present

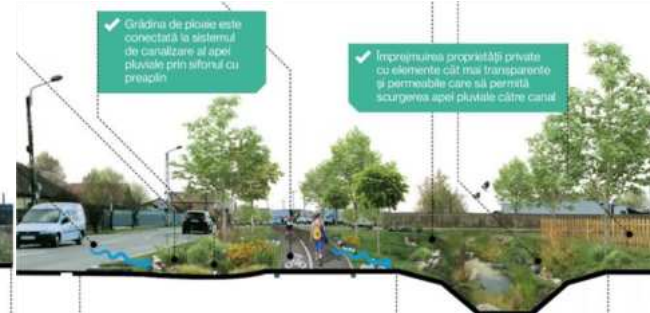

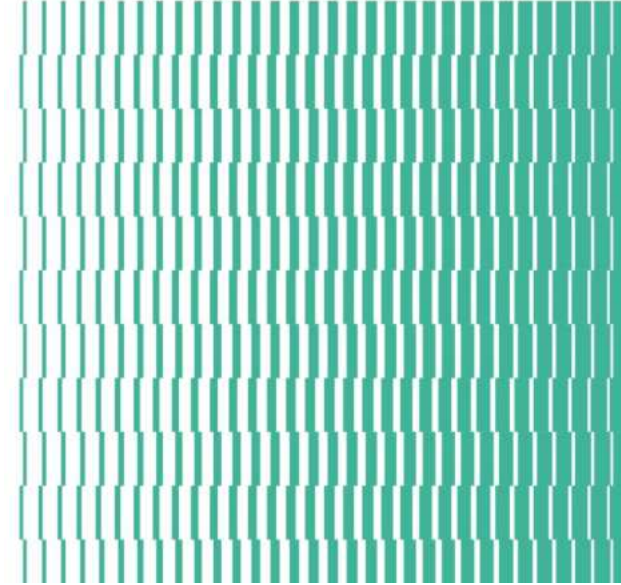

Timișoara verde-abiastă

Ghid de bune practici pentru amenajarea coridoarelor ecologice în Polul de creștere Timișoara
